Technical Information

The object of the coupage is to obtain a different and special wine, using the Tempranillo and Syrah varieties of several Spanish viticultural origins, which provide their own particularities. The grapes come from old vines and are collected manually. The vinifications are made in stainless steel tanks for 10-14 days with controlled temperatures of 26-28°C. The wine remains in American oak barrels for 3-4 months until the end of the malolactic fermentation. After determining the mixture and the wines are assembled.

Technical Information

This wine is made from Garnacha and Tempranillo grape varieties. These are carefully monitored to ensure perfect maturity while limiting the concentration of anthocyanins in order to obtain a pale coloured Rosé. This also allows for juices with good acidity and freshness, perfect for this wine style. Each variety is treated separately, with a limited maceration of just 2-3 hours, followed by very soft pressing and static draining to obtain very clean musts. The fermentations take place at very low temperatures, similar to white wines, at around 12-14°C, with extended lees contact for 3-4 months before assembly and bottling.
