Grapes are hand-picked and transported to the winery in small baskets in order to preserve the bunches whole and undamaged. Then the grapes are destemmed and proceed to cold maceration (for 2-3 days at very low temperatures). Fermentation takes place at moderate temperatures (26° to 27°C) to express the maximum aromatic potential and colour of the grape. After the malolactic fermentation the wine remains in contact with fine lees for a few months to preserve an intense fruit character, concentration and softness.
