### Technical Information

The object of the coupage is to obtain a different and special wine, using the Tempranillo and Syrah varieties of the Spanish viticultural origins, which provide their own particularities.

The grapes come from old vines and are collected manually. The vinifications are made in stainless steel tanks for 10-14 days with controlled temperatures of 26-28°C. The wine remains in American oak barrels for 3-4 months until the end of the malolactic fermentation. After determining the mixture and the wines are assembled.
